

Nishue Software Documentation

Nishue installation involves 2 part: Backend and frontend installation.

****Backend Installation:**

1. Extract the zip file you got from Envato on your server. Then go to your browser and type your domain/backend/install. You will see an installation form like below.

Bdtask software installer

1. Requirement 2. Envato License 3. Environment Requirement 4. Database Configuration 5. Admin Configuration

Server Requirements

Server Requirements	Status
You have PHP >8.1.0 (or greater; Current Version: 8.2.18)	Success
You have the openSSL extension	Success
You have the pdo extension	Success
You have the mbstring extension	Success
You have the json extension	Success
You have the curl extension	Success
You have the tokenizer extension	Success
You have the xml extension	Success

2. Enter you Envato software username and license key

Bdtask software installer

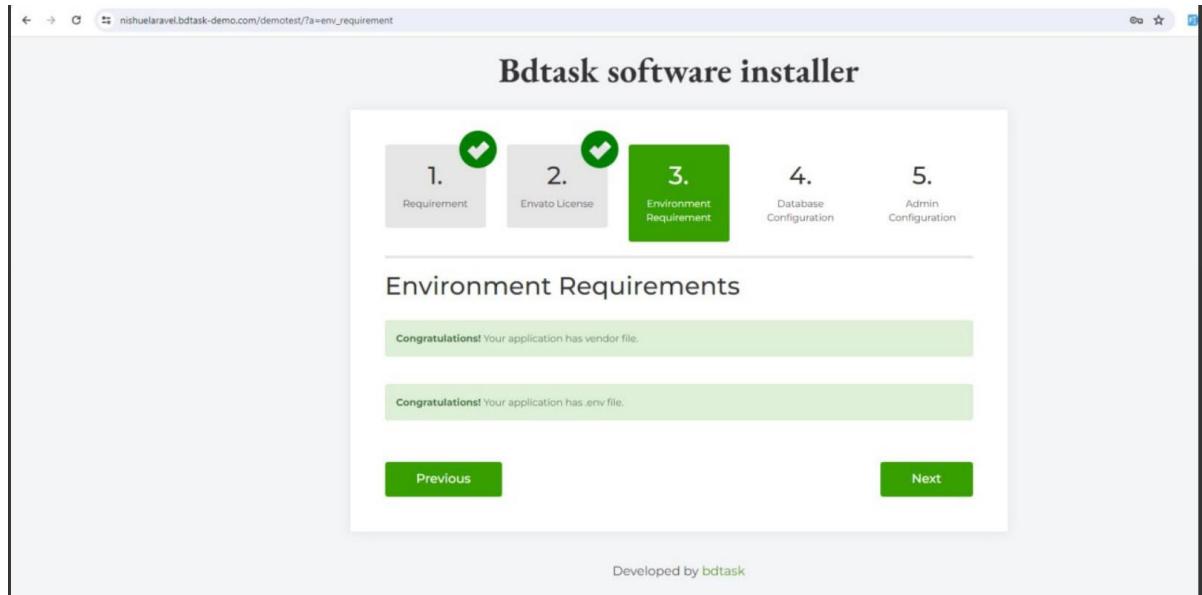

1. Requirement 2. Envato License 3. Environment Requirement 4. Database Configuration 5. Admin Configuration

Envato License

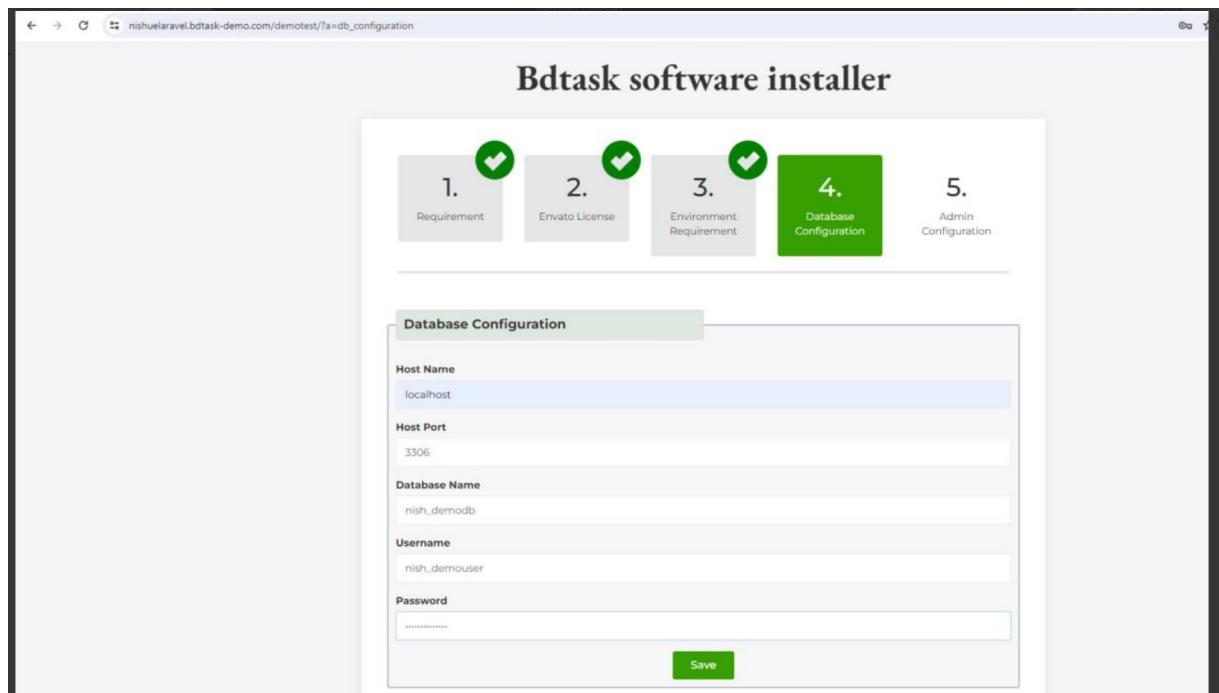

Envato User ID	Purchase Key
admin@demo.com

Previous

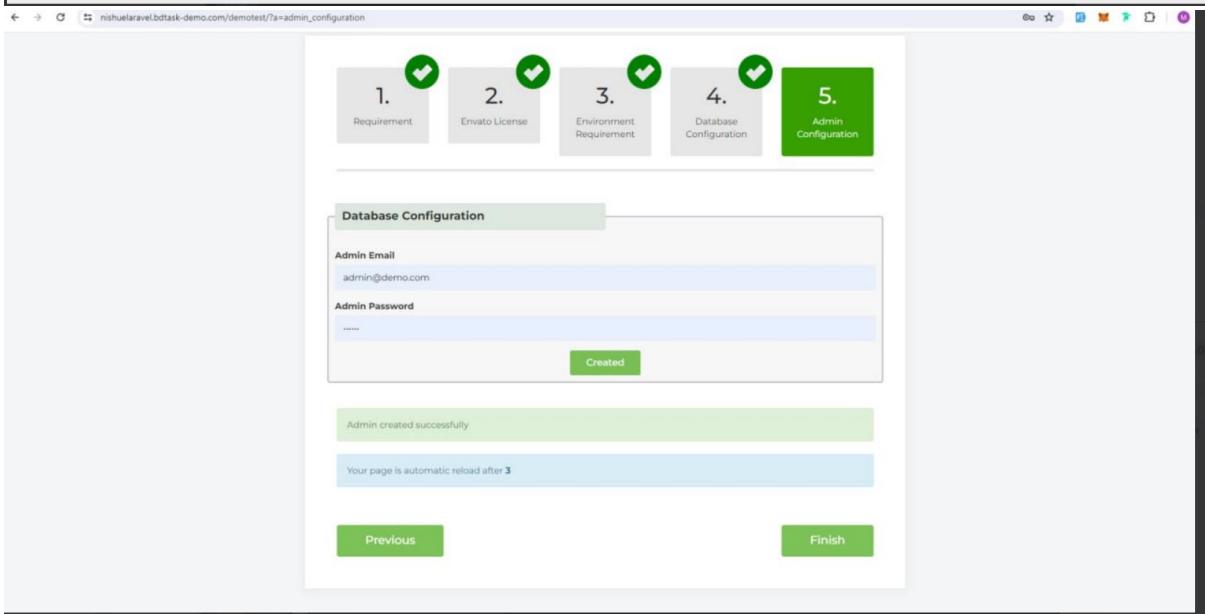

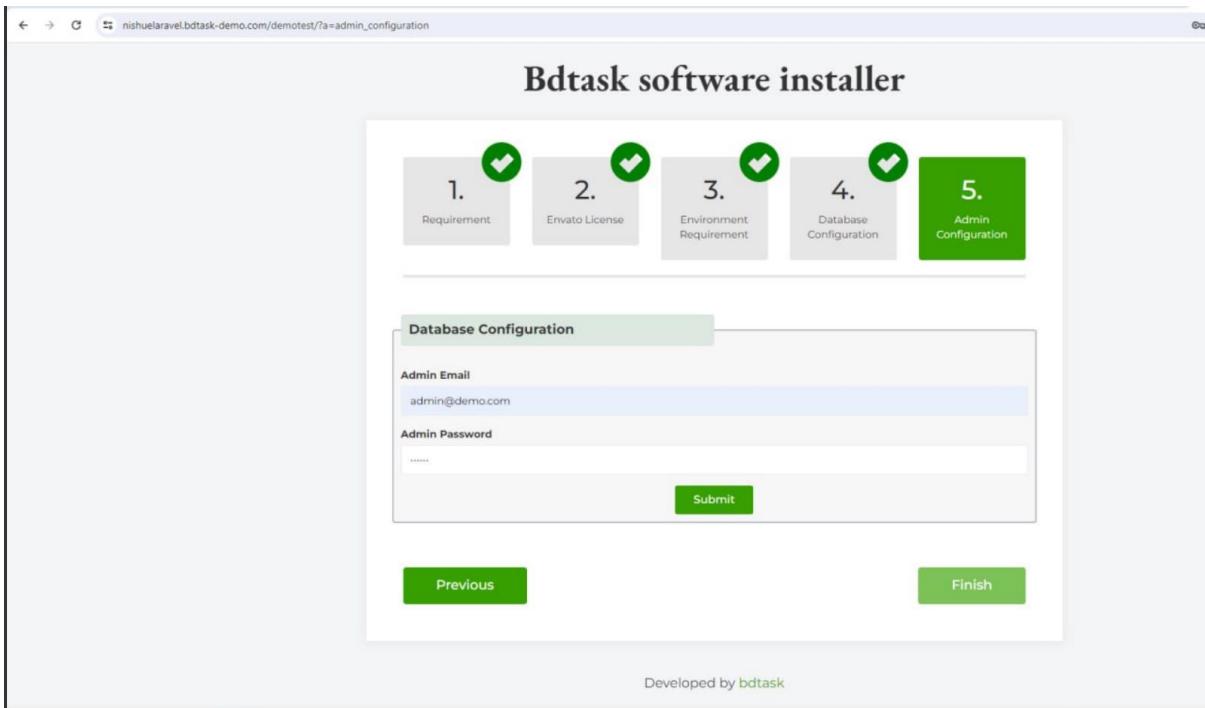

3. If the credentials are correct, you will be moved to step 3

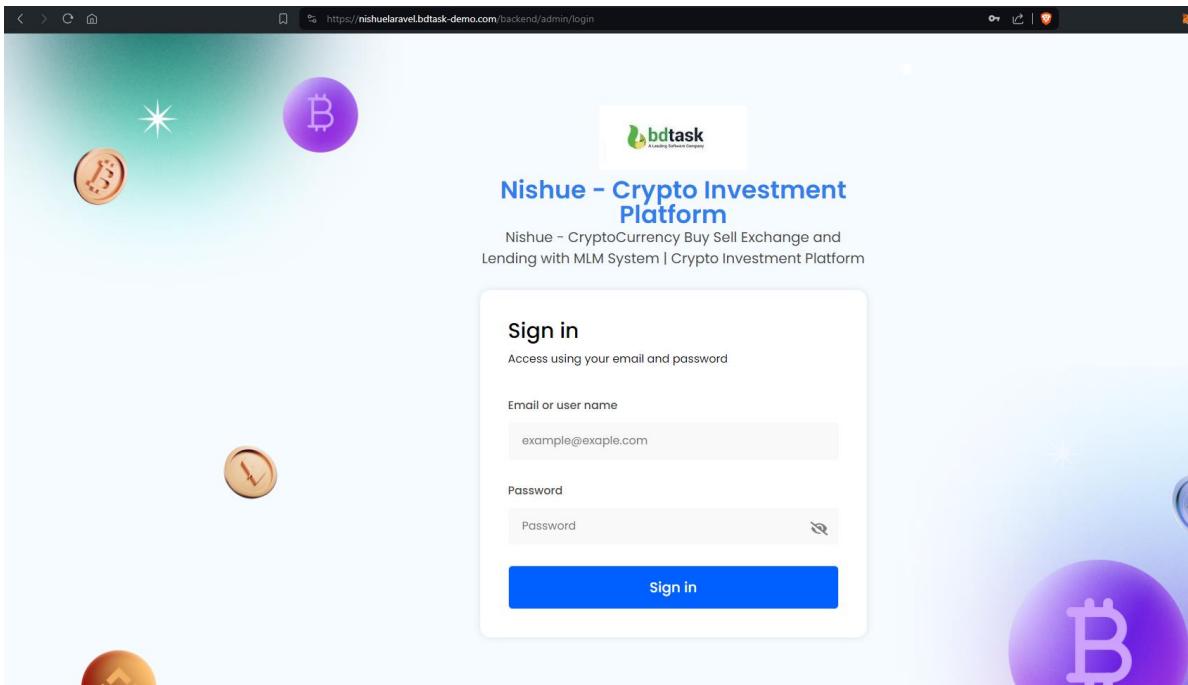

4. You will need to create a database from your server and then enter your database credentials.

5. If the database credentials are correct, you will redirect to your software credentials page. This page will list the credentials you will use to login to software.

- When installation is done, it will redirect you to admin panel. The URL should be your **domain_name/backend/admin/login**.
Customer URL should be your **domain_name/backend/customer/login**.

**** Frontend Build for cPanel:**

Deploying a ReactJS application on cPanel involves several steps, including building your React app for production, uploading the build files to your cPanel account, and configuring your domain to point to the uploaded files. Below is a step-by-step guide with images to help you through the process.

Before getting started, you have to install Node.js on your machine.

How to Install Node.JS on Windows?

Step #1

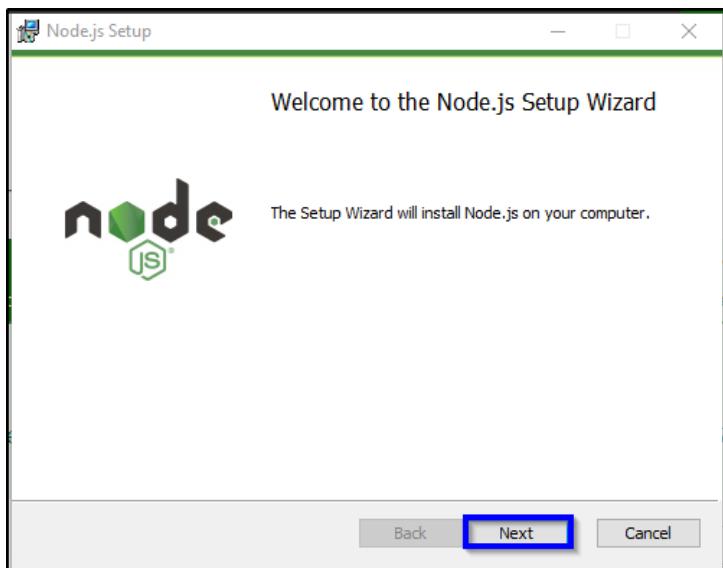

The next step is to download the Node JS. From its official website.

Head over to <https://nodejs.org/en/download/> and download the Windows Installer and Binary file.

Once you've downloaded both files, go to your downloads folder, where they are saved, and initiate the installation process.

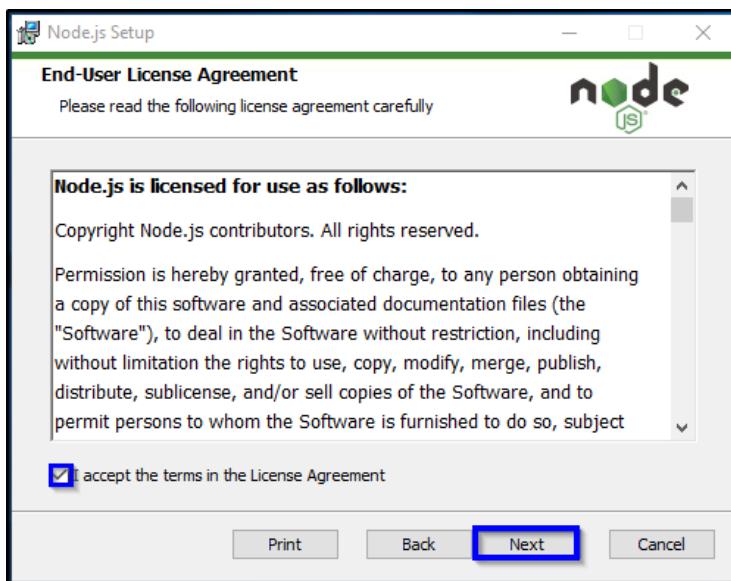

Step #2

The Node JS. Installation wizard will prompt you as you initiate the installation process, as shown in the image below.

Step #3

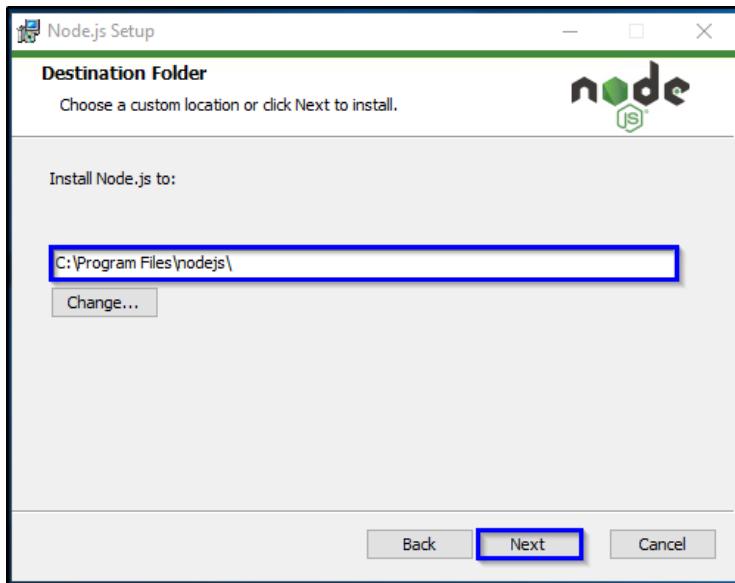

As highlighted in the above image, click the 'Next' button a few times to reach the End-User License Agreement page in the installation wizard.

As highlighted in the above image, click on the checkmark box that reads 'I accept the terms in the License Agreement' and click the 'Next' button.

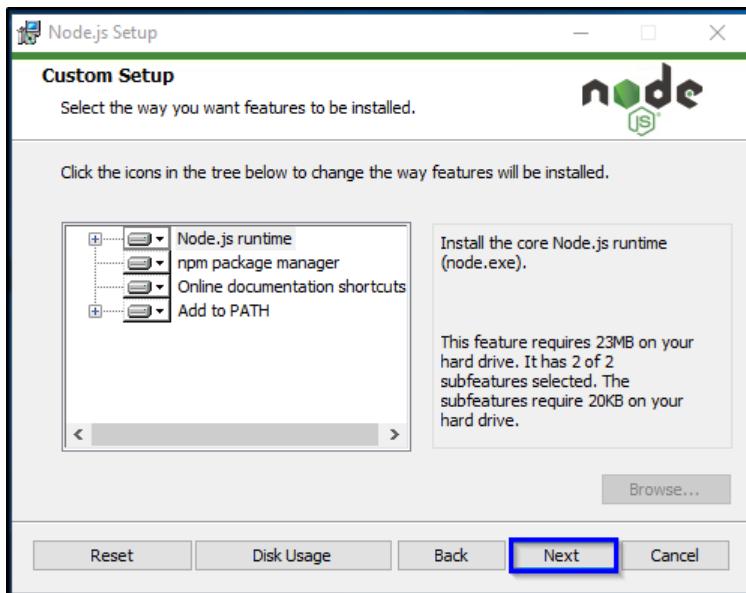

Step #4

On the next page, you will have the option to change the location to which you want to install Node JS. You can either change it or keep it as it is.

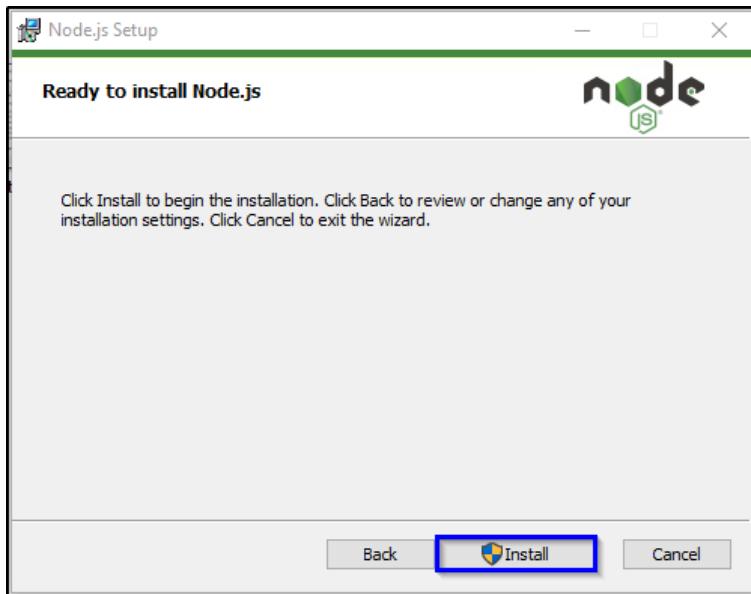

Step #6

After clicking the 'Next' button, you will be prompted with a list of features to install.

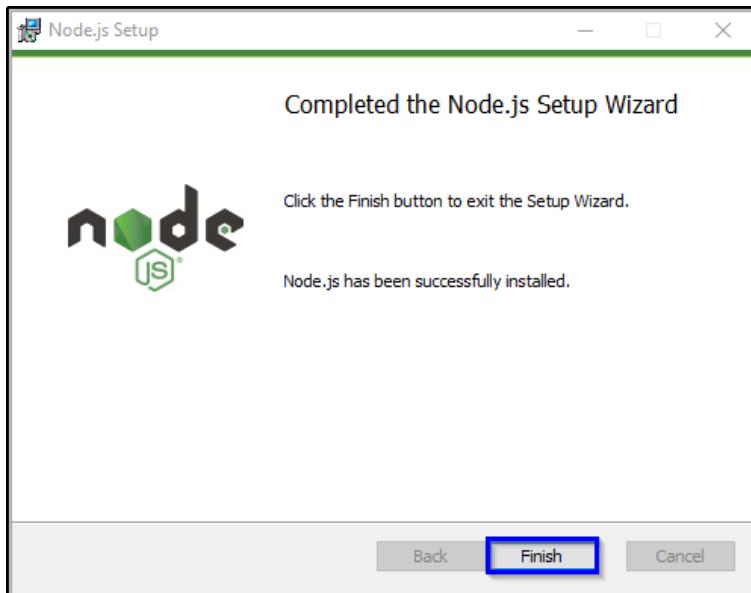

Step #6

As highlighted in the image below, click on the 'Next' button and then the 'Install' button.

Step #7

Once the installation is finished, exit the wizard by clicking the 'Finish' button.

With this step, you have finally installed the main part of Node JS on your Windows system.

How do you build the application?

1. Add the Homepage to your package.json File

Open up your project folder. Then open up your package.json file and add a "homepage" attribute like so:

```
{  
  "name": "nishue-crypto-currency", "nishue": Unknown word.  
  "homepage": "https://nishuelaravel.bdtask-demo.com", You, 7 minutes ago *  
  "version": "0.1.0",  
  "private": true,  
  "scripts": {  
    "dev": "next dev",  
    "build": "next build",  
    "start": "next start",  
    "lint": "next lint"  
  },  
  "dependencies": {  
    "@headlessui/react": "^1.7.18", "headlessui": Unknown word.  
    "@tanstack/react-query": "^5.28.9", "tanstack": Unknown word.  
    "@tanstack/react-query-devtools": "^5.28.10", "tanstack": Unknown word.  
    "axios": "^1.6.8",  
    "latest-version": "^9.0.0",  
    "lodash": "^4.17.21",  
    "next": "14.1.0",  
    "react": "^18",  
    "react-dom": "^18",  
    "react-hot-toast": "^2.4.1",  
    "react-icons": "^5.2.0",  
    "react-select-country-list": "^2.2.3",  
    "sass": "^1.71.1",  
    "sharp": "^0.33.3",  
    "swiper": "^11.0.7" "swiper": Unknown word.  
  },  
  "devDependencies": {  
    "@types/node": "20.11.21",  
    "@types/react": "18.2.60",  
    "autoprefixer": "^10.0.1",  
    "postcss": "^8",  
    "tailwindcss": "^3.3.0",  
    "typescript": "5.3.3"  
  }  
}
```

The format should be "homepage": "<http://yourdomainname.whatever>"

2. Update environment variables

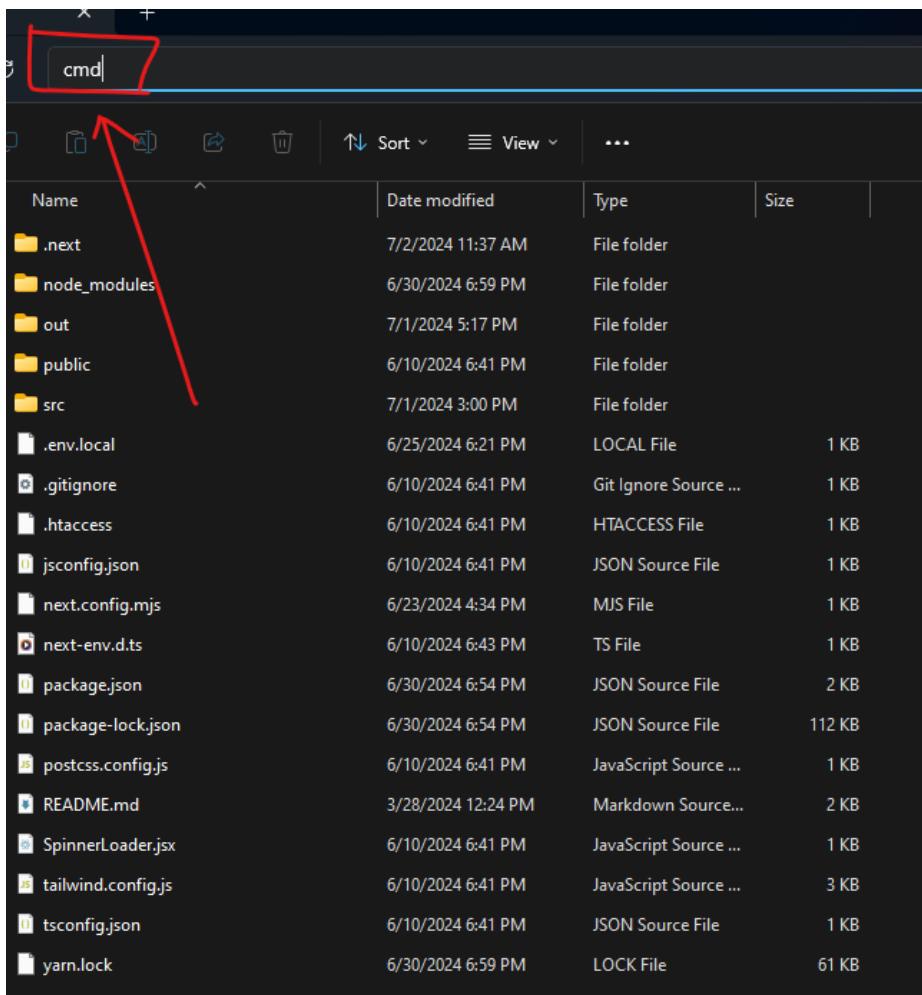

Open up the ".env.local" file, then add the API base URL and the image base URL like so:

```
1 NEXT_PUBLIC_API_BASE_URL=https://nishuelaravel.bdtask-demo.com/backend/api/v1/  
2 NEXT_PUBLIC_IMAGE_BASE_URL=https://nishuelaravel.bdtask-demo.com/backend/storage/
```

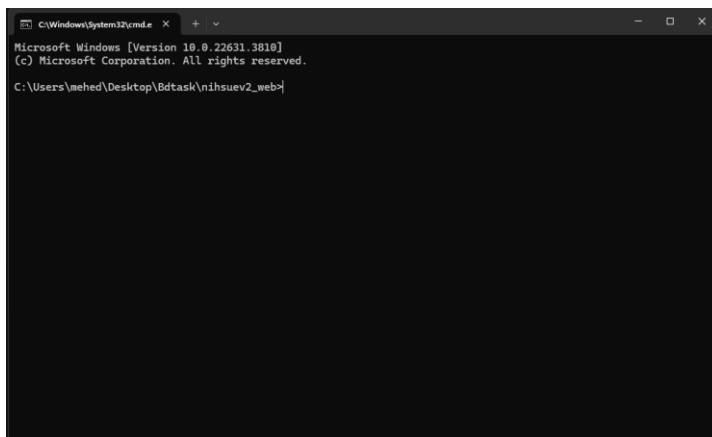

3. Create the build File

Open the command line application

Open the project's directory, click on the address bar, write **cmd**, and hit enter.

In your project's root directory, run “npm install” to install the updated dependencies. Once this has finished, the following command you'll run is “npm run build”.

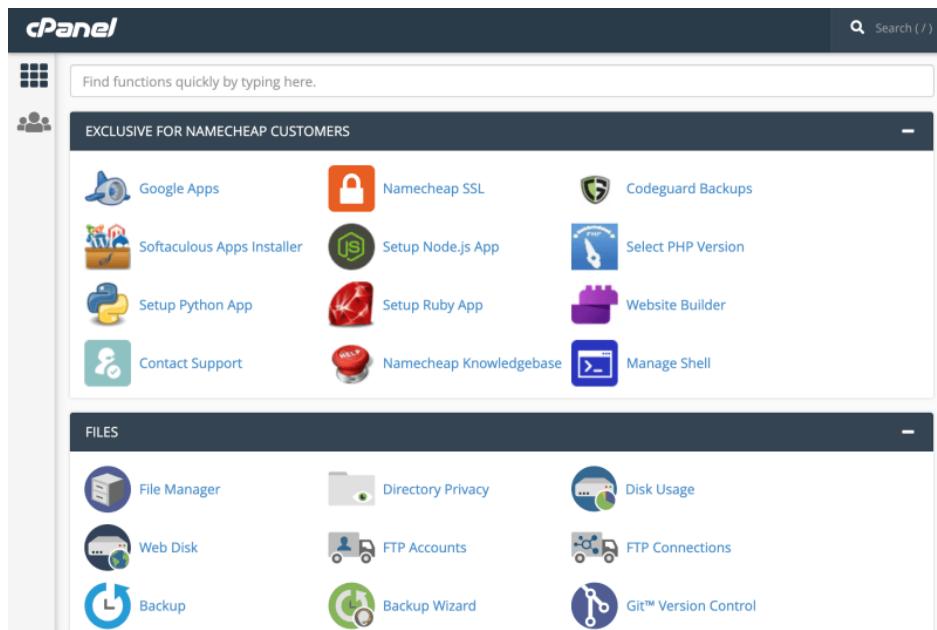

You'll notice this creates a new directory in your project called **out**. The out folder is a super-compressed version of your program that has everything your browser needs to identify and run your app.

Name	Date modified	Type	Size
📁 .next	7/2/2024 11:37 AM	File folder	
📁 node_modules	6/30/2024 6:59 PM	File folder	
📁 out	7/1/2024 5:17 PM	File folder	
📁 public	6/10/2024 6:41 PM	File folder	
📁 src	7/1/2024 3:00 PM	File folder	
📄 .env.local	6/25/2024 6:21 PM	LOCAL File	1 KB
📄 .gitignore	6/10/2024 6:41 PM	Git Ignore Source ...	1 KB
📄 .htaccess	6/10/2024 6:41 PM	HTACCESS File	1 KB
📄 jsconfig.json	6/10/2024 6:41 PM	JSON Source File	1 KB
📄 next.config.mjs	6/23/2024 4:34 PM	MJS File	1 KB
📄 next-env.d.ts	6/10/2024 6:43 PM	TS File	1 KB
📄 package.json	6/30/2024 6:54 PM	JSON Source File	2 KB
📄 package-lock.json	6/30/2024 6:54 PM	JSON Source File	112 KB
📄 postcss.config.js	6/10/2024 6:41 PM	JavaScript Source ...	1 KB

📄 tsconfig.json	6/10/2024 6:41 PM	JSON Source File	1 KB
📄 yarn.lock	6/30/2024 6:59 PM	LOCK File	61 KB

4. Connect to cPanel

Let's head to your hosting provider (Namecheap, Godaddy, Bluehost, etc.). Once you've logged in, navigate to the cPanel manager for your domain. Typically, a dropdown menu says "Manage," which will direct you to cPanel.

Your cPanel manager should look something like this:

Navigate into the File Manager and go to `public_html` folder.

5. Add the Build File Contents to `public_html`

Navigate to the build file in your app's root directory. Open it up and select all the contents inside the `out` folder. If you upload the entire build file, the process will not work. You will need to only upload the contents inside the `out` folder.

blog	0.00 KB	Jul 2 2024

quick-exchange-confirm.txt	6.00 KB	Jul 2 2024

Once you've copied all the contents inside the build file, upload them into public_html.

5. the .htaccess File

Make sure you copy and paste this .htaccess file to public_html folder along with other files. You can find it in your frontend folder source file. This is a required file to run the frontend.

Name	^	Date modified	Type	Size
public		10-Jun-24 6:41 PM	File folder	
src		01-Jun-24 3:00 PM	File folder	
.env.local		25-Jun-24 6:21 PM	LOCAL File	1 KB
.gitignore		10-Jun-24 6:41 PM	Text Document	1 KB

yarn.lock		30-Jun-24 6:59 PM	LOCK File	61 KB

That's it! Navigate to your domain address in the browser, and you should see your fully functioning web app.

Frontend Build using SSH:

Please follow the instructions above and install the NodeJS.

How do you build the application?

1. Add the Homepage to your package.json File

Open up your project folder. Then open up your package.json file and add a "homepage" attribute like

so:

```
{  
  "name": "nishue-crypto-currency", "nishue": "Unknown word.  
  "homepage": "https://nishuelaravel.bdtask-demo.com", You, 7 minutes ago *  
  "version": "0.1.0",  
  "private": true,  
  "scripts": {  
    "dev": "next dev",  
    "build": "next build",  
    "start": "next start",  
    "lint": "next lint"  
  },  
  "dependencies": {  
    "@headlessui/react": "^1.7.18", "headlessui": Unknown word.  
    "@tanstack/react-query": "^5.28.9", "tanstack": Unknown word.  
    "@tanstack/react-query-devtools": "^5.28.10", "tanstack": Unknown word.  
    "axios": "^1.6.8",  
    "latest-version": "^9.0.0",  
    "lodash": "^4.17.21",  
    "next": "14.1.0",  
    "react": "^18",  
    "react-dom": "^18",  
    "react-hot-toast": "^2.4.1",  
    "react-icons": "^5.2.0",  
    "react-select-country-list": "^2.2.3",  
    "sass": "^1.71.1",  
    "sharp": "^0.33.3",  
    "swiper": "^11.0.7" "swiper": Unknown word.  
  },  
  "devDependencies": {  
    "@types/node": "20.11.21",  
    "@types/react": "18.2.60",  
    "autoprefixer": "^10.0.1",  
    "postcss": "^8",  
    "tailwindcss": "^3.3.0",  
    "typescript": "5.3.3"  
  }  
}
```

The format should be "homepage": "<http://yourdomainname.whatever>"

2. Update environment variables

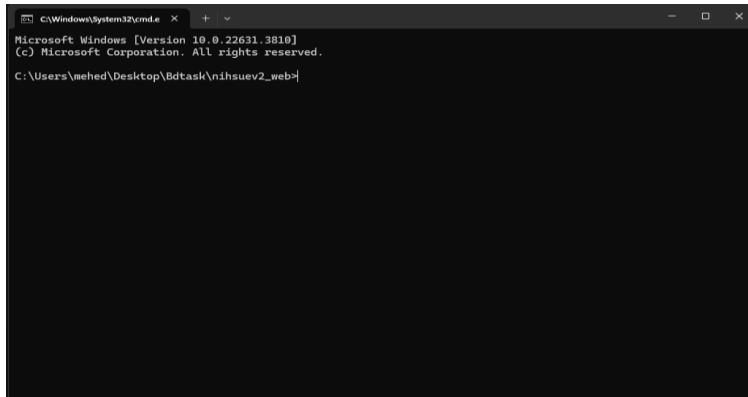

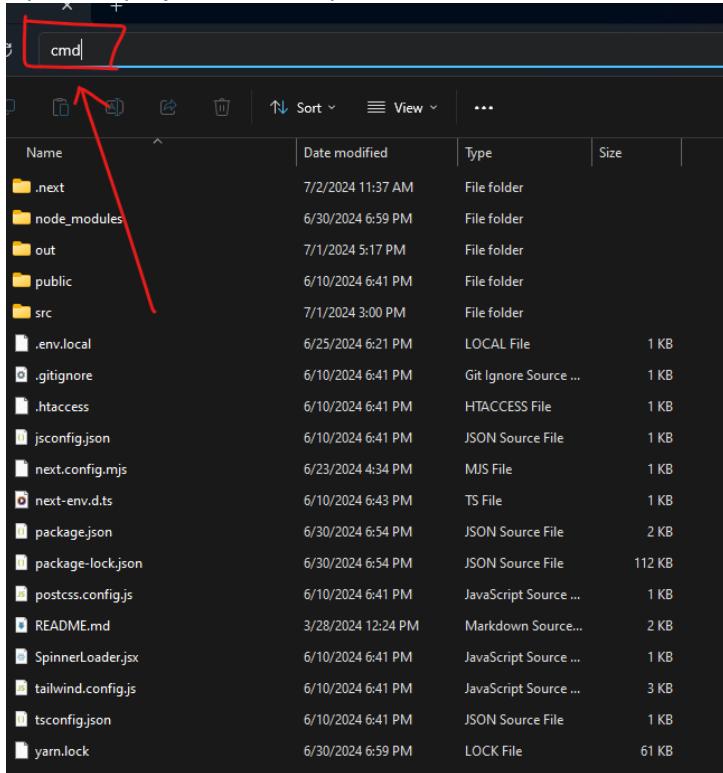

Open up the ".env.local" file, then add the API base URL and the image base URL like so:

```
● ● ●  
1 NEXT_PUBLIC_API_BASE_URL=https://nishuelaravel.bdtask-demo.com/backend/api/v1/  
2 NEXT_PUBLIC_IMAGE_BASE_URL=https://nishuelaravel.bdtask-demo.com/backend/storage/
```

3. Create the build File

Open the command line application

Open the project's directory, click on the address bar, write cmd, and hit enter.

In your project's root directory, run “npm install” to install the updated dependencies. Once this has finished, the following command you'll run is “npm run build”.

You'll notice this creates a new directory in your project called out. The out folder is a super-compressed version of your program that has everything your browser needs to identify and run your app.

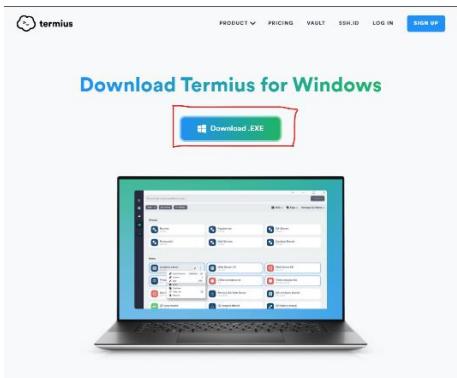

Name	Date modified	Type	Size

yarn.lock	6/30/2024 6:59 PM	LOCK File	61 KB

How do you deploy the application using SSH client?

Follow the instructions below -

Download and Install Terminus

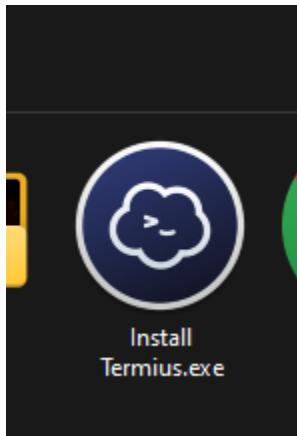

- Visit the Terminus Website: <https://terminus.com/download/windows>
- Download the Installer:
Click on the Download button

Download the installer.

Locate the downloaded .exe file and double-click it to run the installer.

You might see a security warning. Click **Run** or **Yes** to proceed.

- **Follow the Installation Wizard:**

The installation wizard will guide you through the installation process.

Accept the license agreement, choose the installation directory (or leave it as default), and click **Install**.

- **Complete the Installation:**

Once the installation is complete, click **Finish**.

Terminus should now be installed on your system.

1: Starting SSH Terminal

Open the Terminus (an SSH Client), then open the terminal and write the following command.

`ssh -p <port for ssh> <username>@<hostname>`

And Press Enter.

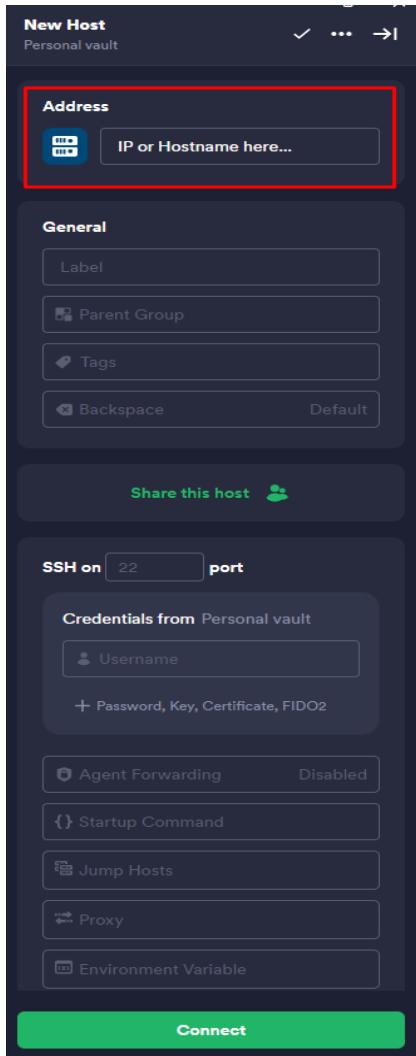

The default port for SSH is 22 but some web hosting services specify some other ports. As of A2 Hosting, it allows SSH at 7822.

You can find this information in your account information.

Connection Details	
Website URL	[REDACTED]
Site Administration (cPanel) URL	[REDACTED] http://wwwnl1-ss22.a2hosting.com/cpanel
Nameservers	ns1.a2hosting.com (162.159.25.95) ns2.a2hosting.com (162.159.24.221) ns3.a2hosting.com (162.159.25.82) ns4.a2hosting.com (162.159.24.227)
SSH Port	7822
Hostname (SSH/FTP/POP/IMAP)	nl1-ss22.a2hosting.com
Username (cPanel/SSH/FTP)	[REDACTED]
Password (cPanel/SSH/FTP)	[REDACTED]
Webmail URL	[REDACTED] http://wwwnl1-ss22.a2hosting.com/webmail ⓘ
Incoming E-Mail Server (POP/POP-SSL/IMAP/IMAP-SSL)	[REDACTED]
Outgoing E-Mail Server (SMTP/SMTP-SSL)	[REDACTED]

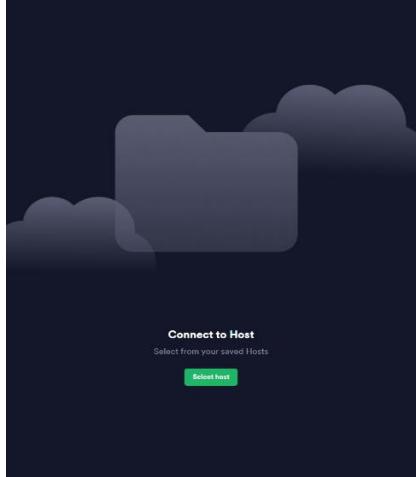

Next, the terminal will ask you for your password, and you will enter the password that is provided in the account information.

You can also do the same job by clicking “New Host.” Then, enter your IP or hostname and password and click on the “Connect” button to connect to the server.

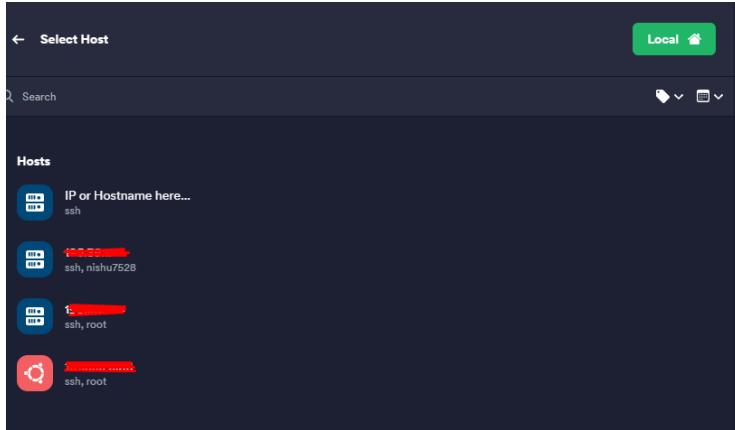

2: Navigate to SFTP

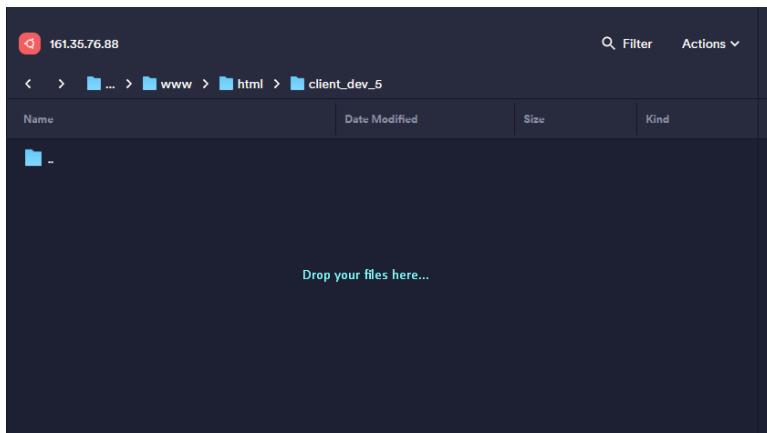

Navigate to the SFTP from sidebar, click on the “Select Host” button

Then, select your desired host from the list.

After that, navigate to var > www > html > your project directory and drop your project files into it.

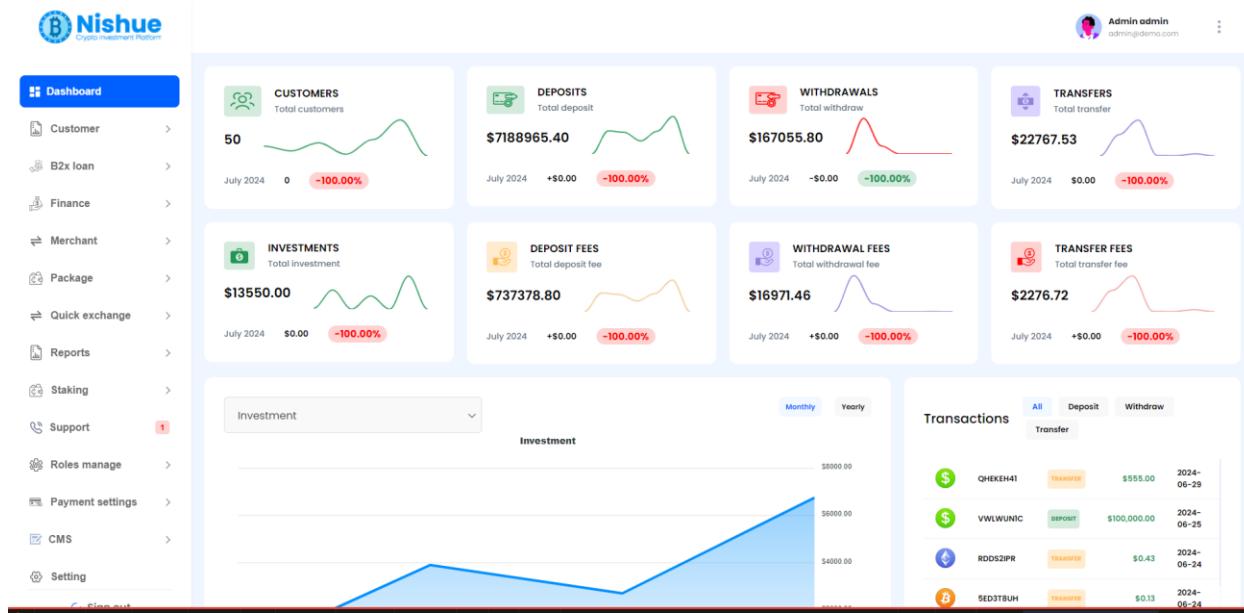

the .htaccess File

Make sure you copy and paste this .htaccess file to your build file with other files. You can find it in your frontend folder source file. This is a required file to run the frontend.

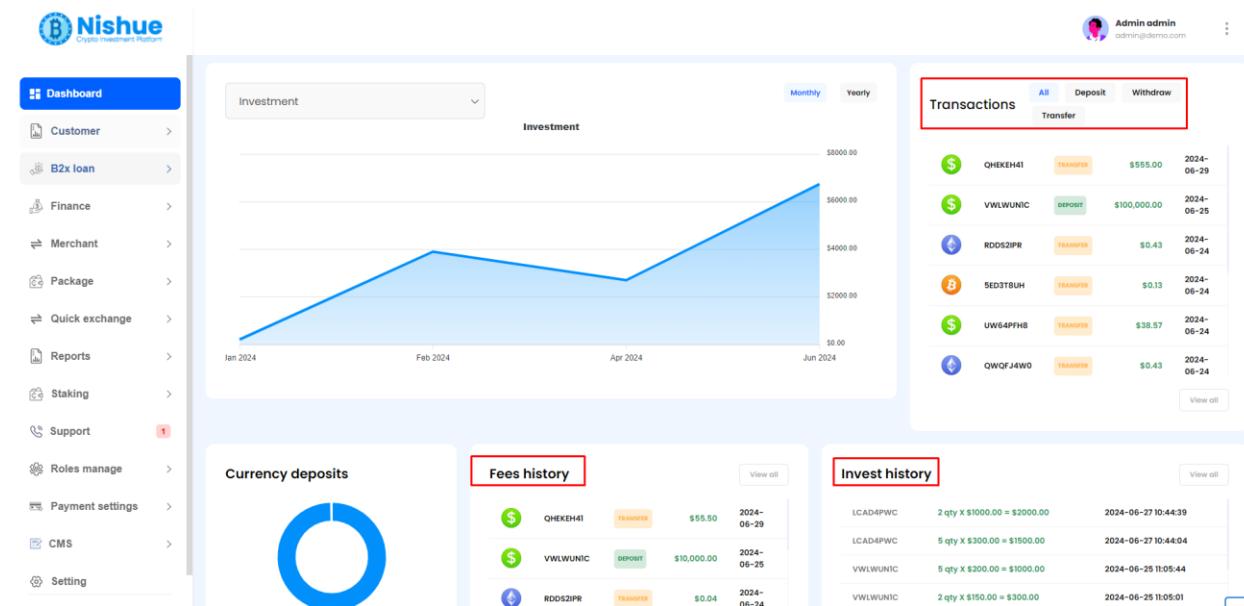

All set! Now, visit your website and see the output.

** Nishue Admin Panel Documentation:

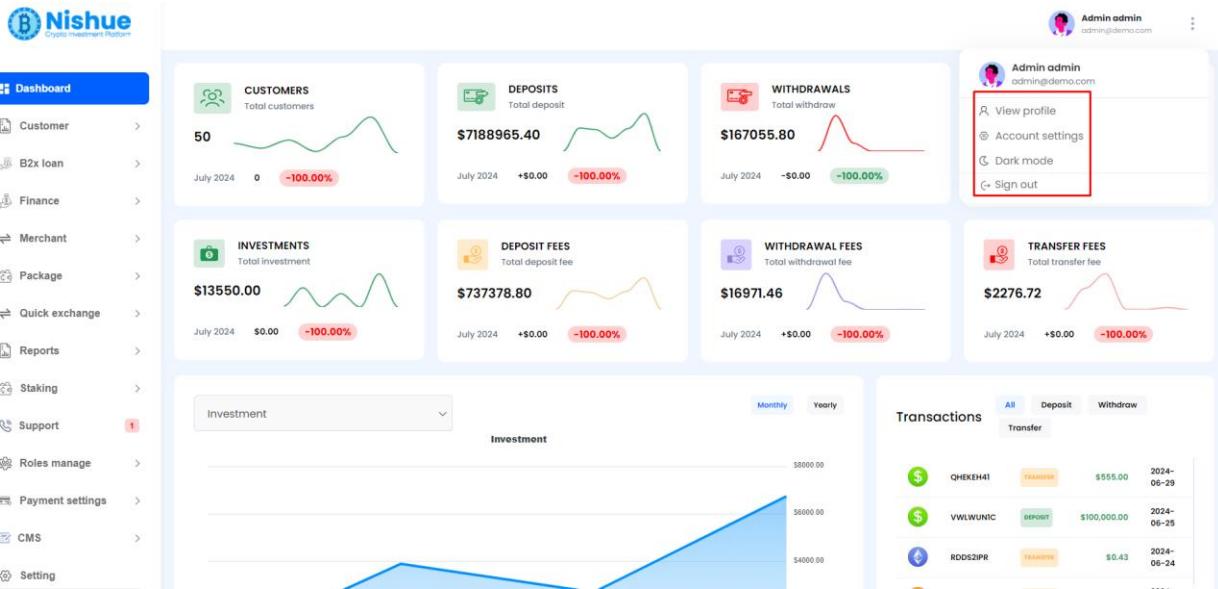

- 1. Dashboard:** When you enter the software, you will first see the dashboard where all the transactions are showed in total amount.

You can see all types of fees, investment history.

Also, you can view or edit admin profile and switch to dark mode from here.

2. Settings:

App Settings: Here you can change basic settings for your software like name, logo, favicon, address, language etc. Set up the cron job on your server for every minutes.

Fees Settings: You can set the fee for every type of transaction from here.

Fee setting

SL	Level	Fee	Action
1	Deposit	10 %	
2	Transfer	10 %	
3	Withdraw	10 %	
4	Repayment	5 %	

Showing 1 to 4 of 4 entries

Commission Setup: When customer purchase a package, you can set the MLM conditions for commission from here.

Commission setup

Level *	Personal investment *	Total investment *	Team bonus *	Referral bonus% *
1	1000	2000	50	5
2	3000	5000	100	4
3	6000	10000	200	3
4	11000	15000	300	2
5	16000	20000	400	1

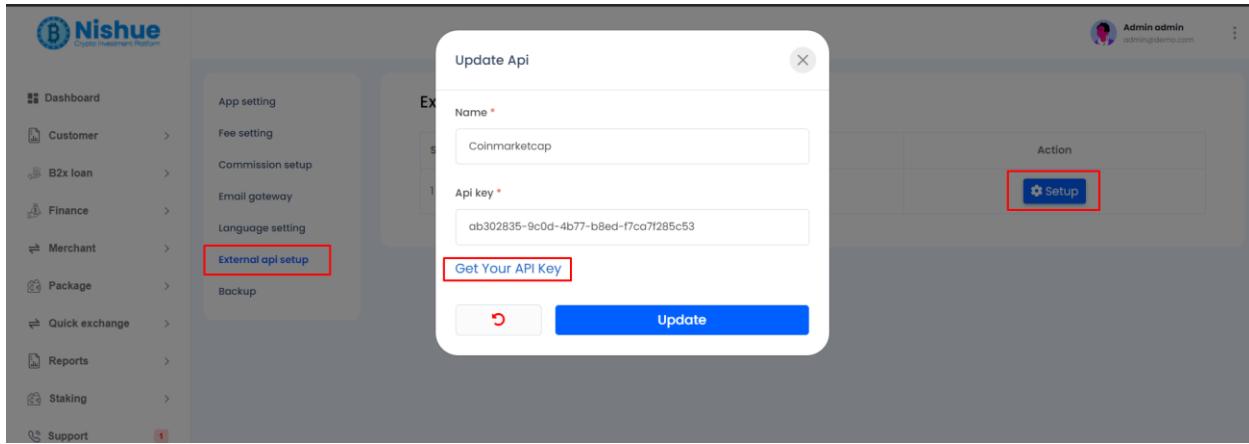

Update

Email Setup: Set up your email gateway credentials. Your customer will receive emails for account activation, withdraw, transfer notification and authentication message.

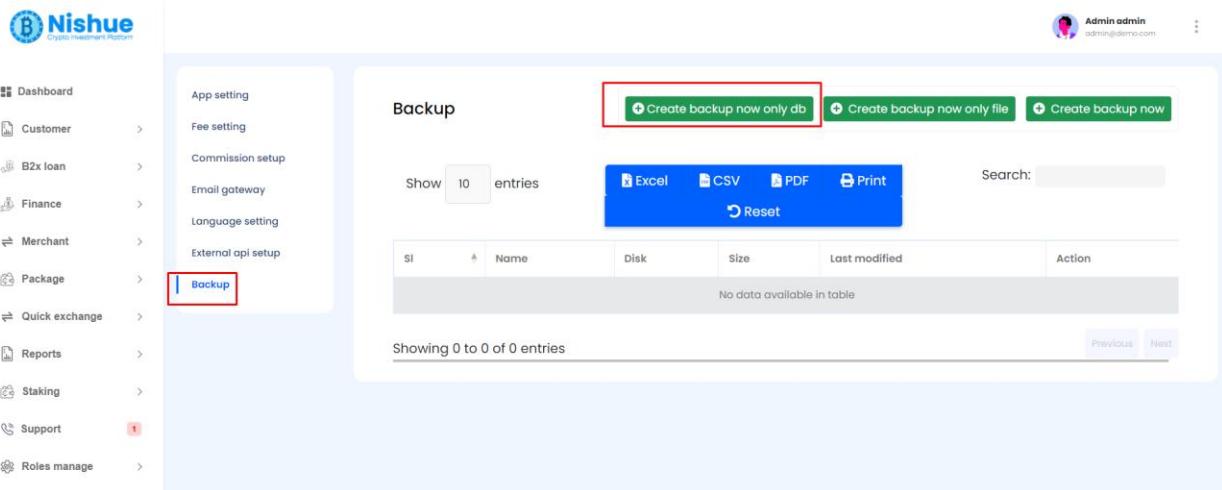

Language: You can add language from here. Then use the builder to translate the phrases into your new language.

Sl	Name	symbol	Logo	Action
1	English	en		
2	Spanish	es		
3	Banglaa	bn		
4	Bangladeshi	bd		

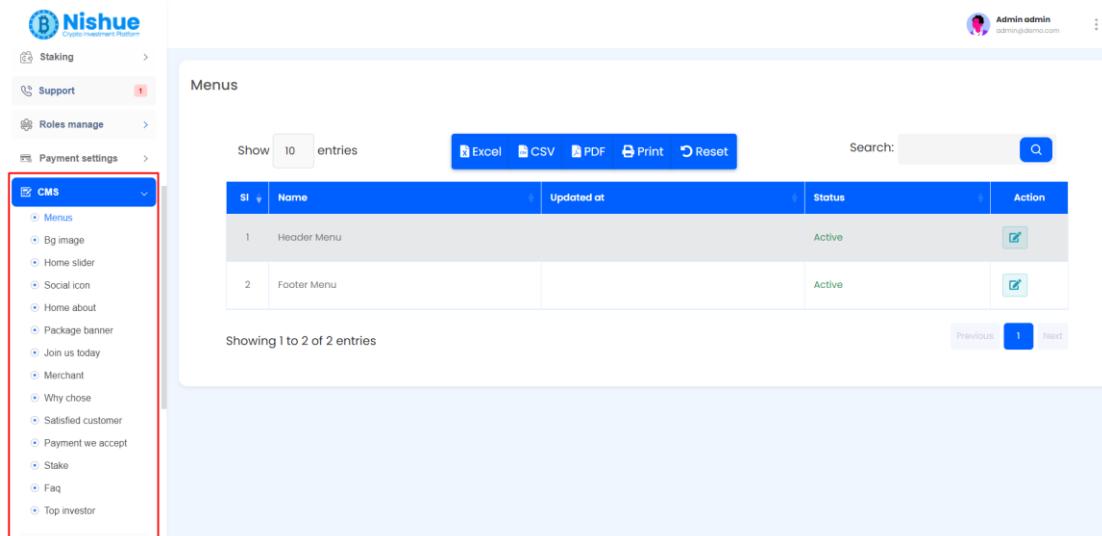

External API: Setup your API keys to get currency rate from coinmarketcap.

Backup: Create backup for your database.

3. CMS(Content Management System): From the CMS admin can create/edit/delete all the contents for the website.

4. Customer:

Customer List: From here, admin can see all the customer, can perform update, and delete operation. Also can add a new customer.

5. B2X Loan:

Overview: This is a unique loan system where user can hold their BTC and in return, they will get half the amount of their holding BTC value as loan. So, if a user hold 2BTC, they can get 1BTC as loan. So the main steps as follows:

First, the customer deposit balance and get a loan which admin will approve.

Second, after the admin approves the loan, the user will try to withdraw the loan amount. After this withdrawal approved by admin, the loan amount will be transferred to the user account.

Third, after the withdrawal has been made, the user will start the repay process. After all the installment has been complete, the loan will be closed. The holding BTC will be added to the customer wallet.

Procedure:

Available packages: Admin can create loans from here. Also check the loans and modify them.

Sl	Name	Status	Action
1	24 Months	ACTIVE	<input checked="" type="checkbox"/> <input type="checkbox"/>

Credit List: Credit list will appear here. Admin can credit to any specific user.

The screenshot shows the Nishue platform's 'Finance' section. On the left, a sidebar menu includes 'Deposit list', 'Pending deposit', 'Withdraw list', 'Pending withdraw', 'Credit list' (which is highlighted with a red box), and 'Transfer'. The main content area displays a 'Credit list' table with 6 entries. A modal window titled 'Add credit' is open, prompting for 'Accept currency', 'User id', 'Amount', and 'Note'. A 'Submit' button is at the bottom of the modal. The top right corner shows the user 'Admin admin'.

Sl	Date	Name	Method	Amount	Coin	Fees	Comments	Status	Action

6	2024-06-25	Demo15 demo15	Credited	2	USD	0	Demo	CONFIRM	View

The screenshot shows the 'Credit list' table from the previous screenshot, but with a red box highlighting the 'Action' column header. The table structure is identical, showing 6 entries with columns for Sl, Date, Name, Method, Amount, Coin, Fees, Comments, Status, and Action.

Transfer: When a customer make a transfer to another, it will show here.

The screenshot shows the 'Transfer list' table. The sidebar menu on the left includes 'Transfer' (highlighted with a red box). The main content area displays a 'Transfer list' table with 5 entries. The table has columns for Sl, Date, Sender, Receiver, Amount, Fees, Comments, Status, and Action. The 'Action' column contains buttons for 'DONE' and 'View'. The top right corner shows the user 'Admin admin'.

7. Merchant:

Overview: Using this feature, any user of Nishue platform can accept payment from their customers outside of this platform for any purposes. Suppose Nishue platform user, let's call him User John, can accept payments into his account from his other business/shop/e-commerce site customers.

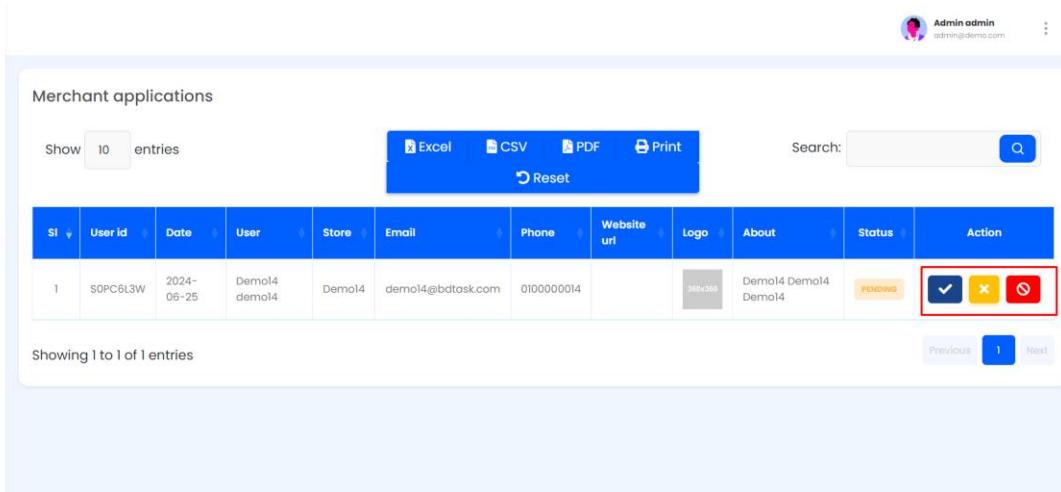

First, John needs to request to admin to upgrade his standard account to Merchant account. After admin approves the request, John now has merchant privileges and can use this feature.

Second, John will create a payment link for his customers/users, from whom he want to receive the payment. John will share this secure payment link to the customer/user via customer email or using any other medium.

Third, once the customer pay the amount via the payment link, John can check the balance in this merchant wallet and also check the transaction report. John now has received payment from his customer.

Procedure:

Merchant Application: When any user apply for merchant privilege, admin will see the application here. Admin can view, approve or reject the application.

Pending withdraw: When the user make a withdrawal from his merchant module, admin needs to approve any pending withdraw from here.

The screenshot shows the Nishue admin dashboard. The sidebar on the left has a 'Merchant' section with several options: Merchant applications, Merchant accounts, Transactions, Transaction fees, Pending withdraw (which is highlighted with a red box), and Withdrawal list. The main content area is titled 'Pending withdraw list' and shows a table with columns: Sl, Date, Store name, User id, Credential, Method, Amount, Fees, Comments, Status, and Action. A message 'No data available in table' is displayed. At the top of the content area, there are buttons for Excel, CSV, PDF, Print, and Reset, along with a search bar.

Withdraw List: Admin will see the withdraw list here

11. Stake:

Overview: Staking is like to depositing money into a high-yield savings account in the world of crypto currency. In return, you earn rewards that are measured as percentage yields.

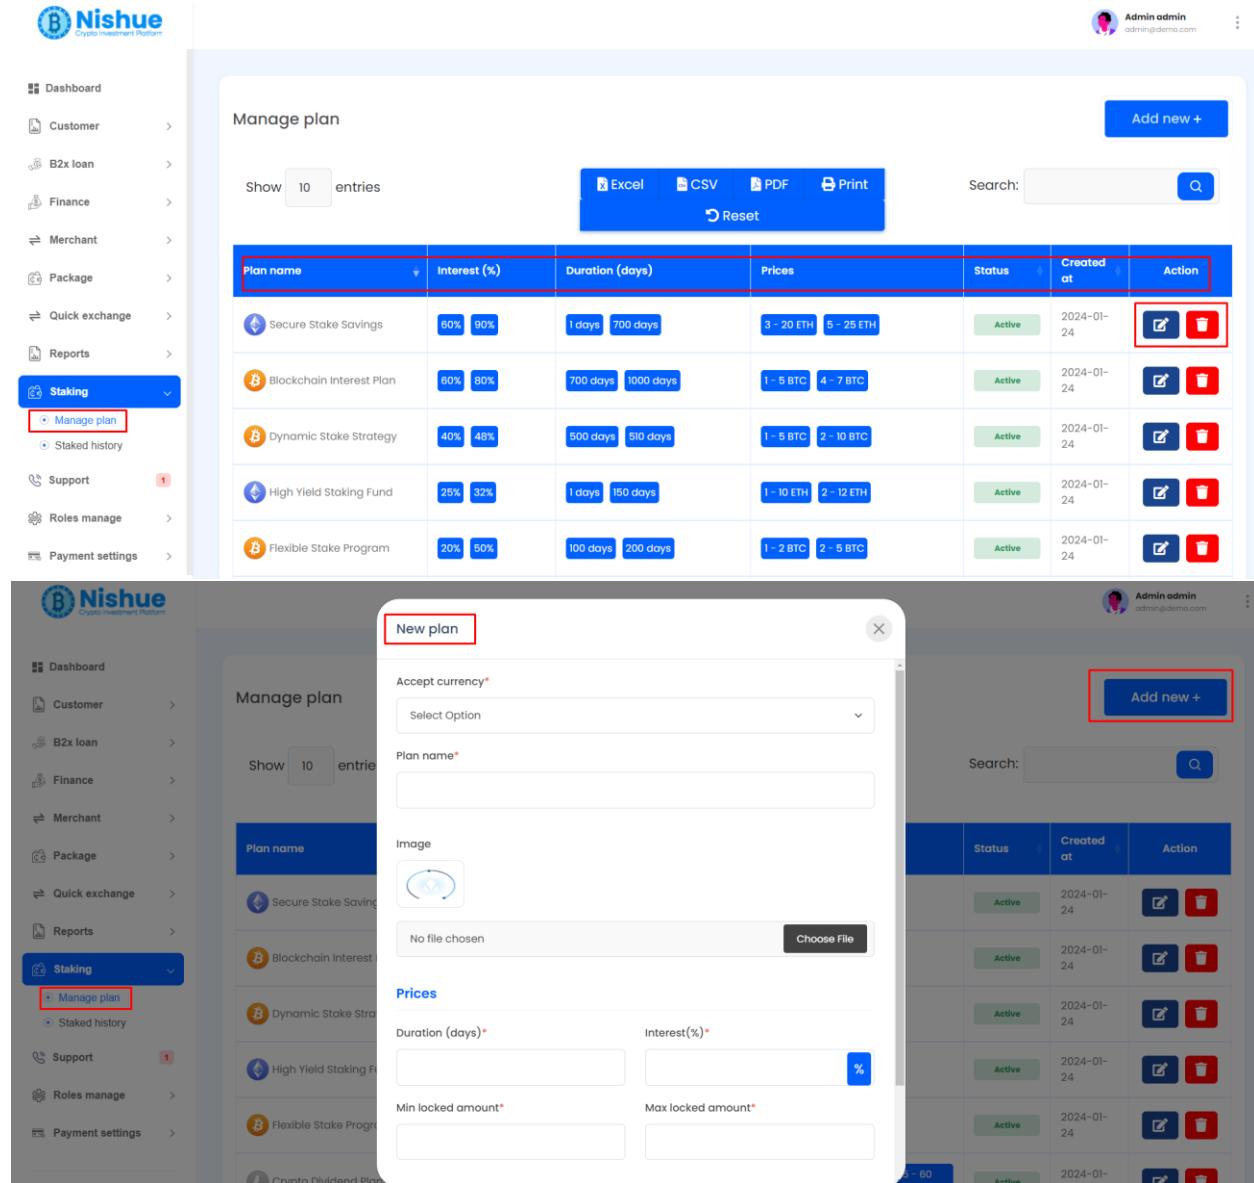

Users can stake/hold their balance in Nishue. After the staked period is over, user will get their staked balance along with their interest amount.

First, User will deposit and use the balance to stake a certain amount from any stake plans.

Second, The stake plan is now in running. After the stake time, user will get the main balance returned into user wallet including the interest. User can then withdraw the amount or invest again if they want from the customer panel.

Procedure:

Stake Plans: Create new stake plan from here. You can see the list of the plans, edit and delete them.

The screenshot displays the Nishue platform's stake management interface. On the left, a sidebar menu includes options like Dashboard, Customer, B2x loan, Finance, Merchant, Package, Quick exchange, Reports, Staking (selected), Manage plan (highlighted), Staked history, Support, Roles manage, and Payment settings. The main content area shows a table of existing stake plans with columns for Plan name, Interest (%), Duration (days), Prices, Status, Created at, and Action (edit and delete buttons). One row is highlighted with a red box around the edit and delete buttons. Below this, a modal window titled 'New plan' is open, prompting for Accept currency*, Plan name*, Image (with a placeholder image and 'No file chosen' message), and Prices (Duration (days)* and Interest(%)* fields). The 'Add new +' button in the modal is also highlighted with a red box. The background table and sidebar are partially visible.

Subscription: When customer stake, admin can view the list here. Depending on the stake stage, admin can check them on the specific section like running, redeemed.

Nishue Customer Panel Documentation:

1. Dashboard: Customer can see all the transaction as a sum in dashboard. He can see the total deposit. Withdraw, transfer of the platform for all time.

Customer can see the investment plans and choose any of them to invest.

Also the recent transactions can be viewed from dashboard.

The dashboard displays a grid of four cards, each showing a profit for interest recurrence with a 'REPEAT' button and a 'S2 Time' indicator. Below this is a 'Recent deposit' section with four entries:

User	Type	Amount	Date
VWLVUNIC	DEPOSIT	\$100,000.00	2024-06-25
RDDS2IPR	DEPOSIT	\$6,948.51	2024-06-24
5ED3TBUH	DEPOSIT	\$66,042.69	2024-06-24
UW64PFH8	DEPOSIT	\$160.00	2024-06-24

Below the deposits is a 'Recent withdraw' section with four entries:

User	Type	Amount	Date
RDDS2IPR	WITHDRAW	\$1.00	2024-06-24
5ED3TBUH	WITHDRAW	\$0.50	2024-06-24
UW64PFH8	WITHDRAW	\$50.00	2024-06-24
QWQFJ4W0	WITHDRAW	\$1.00	2024-06-24

At the bottom is a 'Recent earning list' section with columns for SI, Transaction id, Amount, and Date.

Customer can view his profile, modify his account, and switch to dark-light mode from top right corner.

The dashboard features a summary section with four cards: Estimated balance (\$422,868.12), DEPOSIT (\$168135.90), WITHDRAW (\$6629.90), and Investment (\$7400.00). To the right is a sidebar with a user profile for 'Demo15 demo15' and a 'View profile' button highlighted with a red box. Other options in the sidebar include Account settings, Dark mode, RTL, and Sign out.

Below the summary is an 'Investment plans' section with four cards:

Plan	Interest	Rate
Global Growth Fund Plan	Interest	15 % Weekly
Retirement Security Plan	Interest	17 % Weekly
Future Wealth Portfolio	Interest	20 % Weekly
Emerging Markets Explorer	Interest	22 % Weekly

2. Account: Customer can set up the account from account section. Profile page, customer can see all his personal information. Customer can use the referral link and share it to others for referral user creation.

3. Wallet Manage: This is customer wallet for the platform. He can check his balance for all type of currency here. Also every transaction can be viewed from here as well.

Symbol	Balance
United States Dollar (USD)	281,742.000000
Litecoin Testnet (LTCT)	0.000000
Bitcoin (BTC)	1.430000
Ethereum (ETH)	14.896000

Coin	Date	Transaction type	Transaction	Amount
United States Dollar (USD)	2024-07-01	Debited	Staked	-100.000000
United States Dollar (USD)	2024-06-30	Debited	Staked	-1,000.000000
United States Dollar (USD)	2024-06-30	Debited	Staked	-500.000000
United States Dollar (USD)	2024-06-29	Credited	Received	+555.000000
Bitcoin (BTC)	2024-06-27	Debited	Hold BTC	-0.500000

4. B2X Loan:

Loan calculator: Customer can check how much loan he can take and how much he will get in return. First need to select the amount you want to hold, then select for the duration and hit get a loan. Below you can see the interest percentage, monthly repayment and total repayment.

Loans: When you apply for a loan, the loans will appear here. When status is pending, you will need to wait for admin to approve the loan.

Sl	Package	Interest %	Amount	Hold(BTC)	Inst amount	Installment	Paid Inst.	Rem. Inst.	Remarks	Loan status	Withdraw status	Withdraw note	Action
1	6 Months	5.00	\$33,693.96	1,000000	\$5,896.44	6	0	6		PENDING			
2	6 Months	5.00	\$33,733.93	1,000000	\$5,903.44	6	0	6	accept	APPROVED	PENDING		
3	6 Months	5.00	\$101,201.79	3,000000	\$17,710.31	6	0	6	jol	REJECTED			
4	3 Months	10.00	\$67,467.86	2,000000	\$24,738.22	3	0	3	fty	REJECTED			
5	3 Months	10.00	\$67,756.53	2,000000	\$24,844.06	3	3	0	yes	CLOSED	SUCCESS	qq	
6	3 Months	10.00	\$101,634.80	3,000000	\$37,266.09	3	0	3	a	REJECTED			
7	3 Months	10.00	\$67,756.53	2,000000	\$24,844.06	3	0	3	q	APPROVED	SUCCESS	withdrawl approved	Repay
8	3 Months	10.00	\$67,756.53	2,000000	\$24,844.06	3	0	3	e	REJECTED			
9	3 Months	10.00	\$67,756.53	2,000000	\$24,844.06	3	0	3	n	REJECTED			

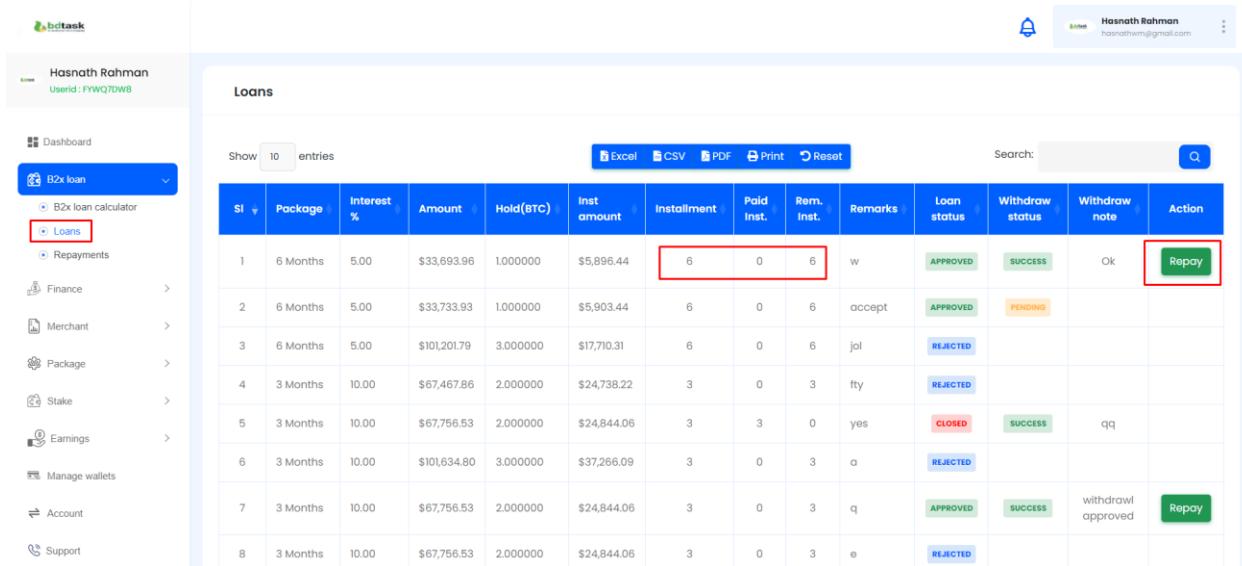

When loan is approved, you can withdraw the amount.

The screenshot shows the B2x loan application interface. On the left, a sidebar menu is open, showing 'B2x loan' selected under 'Loans'. The main area displays a table of loans with columns: Sl, Package, Interest %, Amount, Hold(BTC), Inst amount, Installment, Paid Inst., Rem. Inst., Remarks, Loan status, Withdraw status, Withdraw note, and Action. One row in the table is highlighted with a red box around the 'Action' column, which contains a 'Withdraw' button. A modal dialog titled 'Withdraw request' is open, prompting for 'Method' (with a dropdown menu) and 'Currency' (with a dropdown menu). A 'Submit' button is at the bottom of the dialog. The top right corner of the dialog and the 'Withdraw' button in the table are also highlighted with red boxes.

Then you will need to wait for admin to approve the withdrawal request. After approval, you will get the loan amount in your balance.

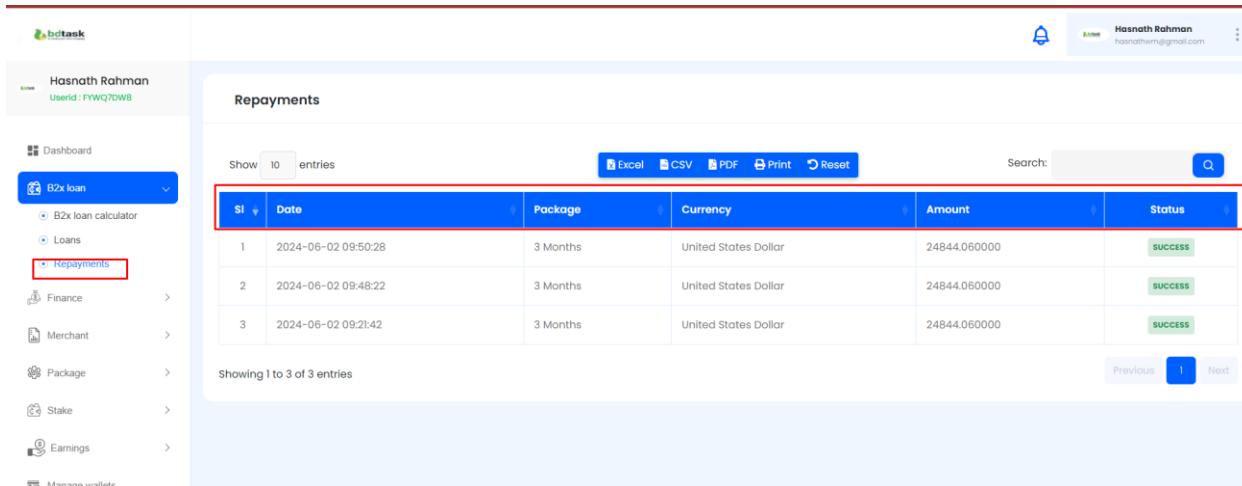

The screenshot shows the B2x loan application interface. The sidebar menu is the same as the previous screenshot. The main area displays the same table of loans. The 'Action' column for the highlighted row now contains a 'Repay' button, indicating the withdrawal has been approved. The 'Withdraw' button in the table is now grayed out. The top right corner of the 'Action' column and the 'Repay' button are highlighted with red boxes.

Now, you will start paying for the repayment. Your installment will decrease after every installment. When you all the installment is done, loan will be closed.

SI	Package	Interest %	Amount	Hold(BTC)	Inst amount	Installment	Paid Inst.	Rem. Inst.	Remarks	Loan status	Withdraw status	Withdraw note	Action

6. Merchant:

Overview: If you (as a Nishue user) want to receive payments from your customers or anyone, you can use Nishue platform to do it. You will simply create a payment URL for the person that you want to receive the amount, share the link with him/her and after he pay via the link, you will receive the amount in your account that you set up in the panel. Admin will receive a percentage of fee if set up in the admin panel.

Merchant Dashboard: Here you can see your customers and total transaction. Also your transactions can be viewed from here.

Payment URL: You can create a payment URL from here when you will need to put these necessary information.

The screenshot shows the Nishue Merchant Platform interface. On the left, there is a sidebar with a user profile (Demo15 demo15, Userid: VWLWUNIC) and a navigation menu under 'Merchant' (Dashboard, Request application, Customers, **Payment url**, All transaction list, Withdraw, Package, Staking, Earnings). The main content area is titled 'Payment url' and shows a table with 5 entries. A modal window titled 'Create Payment Url' is open in the center, with fields for 'Payment name' (Enter payment name), 'Amount' (Amount, USD dropdown), 'Accepted coins' (Accepted coins dropdown), 'Duration' (dd----yyyy--::--), and 'Description' (Enter description). A 'Create' button is at the bottom of the modal. The table in the background has columns: SI, Store name, Amount, Link, Status, Created at, Duration, and Action. The 'Link' column contains 'View link' buttons, which are highlighted with red boxes in the screenshot. The 'Status' column shows 'Active' for most entries. The 'Action' column contains edit and delete icons.

Once you created a payment URL, you can see them in the list. You can share the link to your already added customer to do their transactions.

The screenshot shows the 'Payment url' list page. The sidebar and table structure are identical to the previous screenshot. The table displays 5 entries with the following data:

SI	Store name	Amount	Link	Status	Created at	Duration	Action
1	Payment for Bike	EUR 100.00	View link	Active	July 01, 2024 08:02 AM	July 02, 2024 16:02 PM	Edit Delete

9. Earnings:

Invest Interest: You can see the amount you will get from packages you bought.

#	Invest amount	Qty	Interest	Total interest amount (purchase qty x interest amount)	Received amount	Next interest date	Expiry at
1	\$1000.0000	5	20%	\$200.00	\$40.0000	2024-07-02 11:05:44	2025-06-24
2	\$300.0000	2	15%	\$45.00	\$22.5000	2024-07-02 11:05:01	2025-06-24
3	\$2400.0000	3	30%	\$720.00	\$240.0000	2024-07-02 09:14:29	2025-06-24
4	\$3000.0000	10	22%	\$660.00	\$66.0000	2024-07-02 09:12:29	2025-06-24
5	\$700.0000	1	750	\$750	\$750.0000	2025-06-25 15:12:05	2025-06-25

Capital Return: When you purchase a package and if the capital amount is returned after the time, it will show here.

#	Capital amount	Qty	Interest	Total interest amount (purchase qty x interest amount)	Return amount	Expiry At
---	----------------	-----	----------	--	---------------	-----------

Your referral commission will appear here when anyone create account using your referral code and purchase packages.

#	Amount	Date
1	\$100.00	2024-06-27
2	\$75.00	2024-06-27

Team Bonus: When there are multiple referral users, their team bonus will appear here.

#	Date	Level	Bonus	Status
1	2024-06-27	1	50.00	Completed

Generation: Depending on your and your referral investment, your generation will increase. You can see how many referral users are under you from here.

My generation

SI	User id	User name	Name	Amount
2	LCAD4PWC	demo16	Demo16 demo16	3500
26	UJPIOHIX	meeksarkar99	Meek Sarkar	0

10. Manage Wallet: User can see their balance and transactions in the wallet here. Merchant wallet is a different wallet and not included in here.

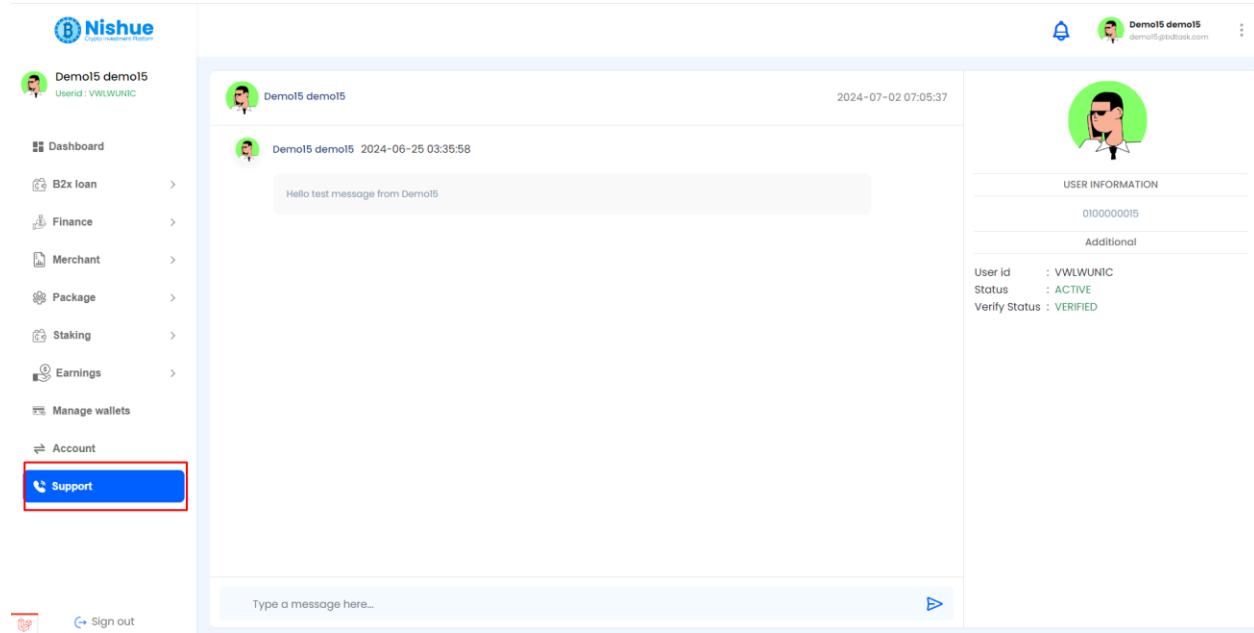

Wallets

Symbol	Balance
USD	281,742.000000
LTCT	0.000000
BTC	1.430000
ETH	14.896000

Coin

Coin	Date	Transaction type	Transaction	Amount
USD	2024-07-01	Debited	Staked	-100.000000
USD	2024-06-30	Debited	Staked	-1,000.000000
USD	2024-06-30	Debited	Staked	-500.000000
USD	2024-06-29	Credited	Received	+555.000000
BTC	2024-06-27	Debited	Hold BTC	-0.500000

10 .Support: Customer can chat directly with admin from support.

The screenshot displays the Nishue app interface. On the left, a sidebar menu lists various features: Dashboard, B2x Loan, Finance, Merchant, Package, Staking, Earnings, Manage wallets, Account, and Support. The 'Support' button is highlighted with a red box. The main content area shows a chat interface with a message from 'Demo15 demo15' to 'Demo15 demo15' dated 2024-07-02 07:05:37. The message content is 'Hello test message from Demo15'. On the right, a user profile section shows a green circular profile picture, the user ID 'Demo15 demo15', the email 'demo15@b2task.com', and a 'USER INFORMATION' table with fields: User Id : VWLWUNIC, Status : ACTIVE, and Verify Status : VERIFIED.

User Information

User Id	: VWLWUNIC
Status	: ACTIVE
Verify Status	: VERIFIED
